

Libvirt Highlights

Jiří Denemark <jdenemar@redhat.com>

KVM Forum 2016

v1.2.18..v2.1.0

- ▶ 3533 commits
- ▶ 114 authors
- ▶ 63 new contributors

v1.2.9..v1.2.18

- ▶ 2477 commits
- ▶ 108 authors
- ▶ 46 new contributors

Main Contributors

Most Active Areas

Starting from 2.0.0

- ▶ major increments with the first release of a year
- ▶ minor increments with each release in the same year
- ▶ micro is used for maintenance releases

The goal

- ▶ `virsh start DOMAIN`
- ▶ `ssh DOMAIN`

Two easy steps

- ▶ `install libvirt-nss`
- ▶ `update /etc/nsswitch.conf`
`hosts: files libvirt dns`

<http://libvirt.org/nss.html>

- ▶ gained some useful APIs
- ▶ Friday 4:30pm

Build Speedups

- ▶ make check
- ▶ make syntax-check

Always run checks before sending/pushing patches

QEMU Driver Highlights

- ▶ lots of cleanups
- ▶ no support for QEMU older than 0.12
- ▶ LUKS encryption for disks
- ▶ migration enhancements (post-copy, multi-threaded compression)
- ▶ perf events
- ▶ improved support for non-x86 archs

The End
